

FEATURES

- Solenoid valves satisfy all relevant EC directives
- Brass bodied valves are designed to provide maximum flow and have an integrated quick exhaust function
- The pilot operated solenoid valves have a resilient (poppet) soft seating for absolute tight shut-off on low and high pressures

OPTIONS

- Valves can also be supplied with FPM (fluorelastomer) and EPDM (ethylene-propylene) sealings, discs and poppets. Use the appropriate optional suffix letter for identification
- Waterproof enclosure with embedded screw terminal coil and Pg 13,5 cable gland to meet CEE-10 (IP67)
- Explosionproof enclosures for hazardous locations according to "CENELEC" and national standards (see section 10)
- Explosionproof and watertight enclosures according to "NEMA" standards
- Compliance with "UL" and "CSA" standards
- Low power execution
- Manual operator available (push button type, suffix "MO" / Maintained type suffix "MS")
- Plug with visual indication and with peak voltage suppression or with cable length of 2m (see section 11)

INSTALLATION

- The valves can be mounted in any position without affecting operation
- **Important:** a minimum operating pressure differential must be maintained between the pressure and exhaust ports. Supply and exhaust piping must be full area and unrestricted
- Two mounting holes are provided in the valve body
- Pipe connection identifier is: B = NPT (ANSI 1.20.3)
- The third digit in the catalogue number indicates the standard pipe connection
- Other pipe threads are available on request
- Installation/maintenance instructions are included with each valve
- Spare Parts Kit and replacement coils are available
